#### **§ 256-2. Permitted locations; approvals and bulk requirements.**

- A. Collocated/existing structure antennas and modifications to existing towers/antennas, approvals, submittal and requirements.
  - (1) Approvals. A collocated or existing structure antenna is permitted without a tower special use permit upon issuance of site plan approval and a building permit. DAS/Microcell applications that also meet the definition of a collocated/existing structure antenna shall only require minor site plan approval and a building permit. The applicant shall also be responsible for all reasonable costs incurred by the Village in reviewing and analyzing an application, including but not limited to, any engineering or technical reports or studies submitted by the applicant relative to its application and any legal fees related thereto. As a condition of approval, the approving department or board may require a removal bond.
  - (2) Submittal and bulk requirements. The site plan and building permit application shall include the following:
    - (a) and (b) remain the same.
    - (c) The height of the new antenna shall extend no more than 15 feet above the height of the existing structure. Antennas projecting over walkways or sidewalks must have a minimum clearance between the bottom of the equipment and the ground of nine feet. ## VILLAGE OF JOHNSON CITY

---

(d) remains the same.

B. Noncollocated/new structure antennas, approvals and bulk requirements.

(1) Requirements for approval. No application for a noncollocated or new structure antenna, regardless of whether such antenna is a DAS/Microcell, shall be considered complete unless and until the applicant shall have submitted a report that establishes to the satisfaction of the Village of Johnson City Planning Board the following:

(a) That the applicant is required to provide service to locations which it is not able to serve through existing facilities which are located either within or outside of the Village, showing the specific locations and/or areas the applicant is seeking to serve.

(b) The report shall set forth an inventory of existing facilities and/or structures, within or outside of the Village, which might be utilized or modified in order to provide coverage to the locations the applicant is seeking to serve and shall include a report on the possibilities and opportunities for collocation as an alternative to a new site.

(c) The applicant must demonstrate that the proposed facility cannot be accommodated on any such existing facility or structure either within or outside of the Village due to one or more of the following reasons:

[1] The proposed equipment would exceed the existing reasonable potential structural capacity of existing facilities or structures within or outside of the Village, considering existing and planned use for those facilities or structures.

[2] The existing or proposed equipment would cause interference with other existing or proposed equipment that could not reasonably be mitigated or prevented.

[3] Said existing facilities or structures do not have space on which the proposed equipment can be placed so it can function effectively and reasonably, and/or the applicant has not been able, following good faith efforts, to reach an agreement with the owner(s) of such facilities or structures.

[4] Other reasons which make it impractical to locate or place the proposed equipment on said facilities or structures.

(2) Bulk requirements.

(a) Noncollocated or new structure antennas, other than DAS/Microcells. In all residential zoning districts, including the PUD District, new or

## VILLAGE OF JOHNSON CITY

relocated towers and antennas shall be set back from all property lines a minimum distance equal to their height (measured from their base) plus 100 feet and in all other zoning districts a minimum distance equal to their height (measured from their base). The towers shall also be set back a minimum distance equal to their height from all power lines. The Planning Board may require an additional setback area in the case of guy wires, taking into consideration the length of the guy wires and the location of ground anchors.

- (b) DAS/Microcells. In residential districts, setbacks from all property lines should be equal to  $\frac{1}{2}$  the height of the structure. In commercial and industrial districts the setbacks from all property lines shall be  $\frac{1}{3}$  the height of the structure. If placed within a public right of way, setback of structure should be determined by acceptable engineering practices. The Planning Board may require an additional setback area in the case of guy wires, taking into consideration the length of the guy wires and the location of ground anchors.
- (3) Tower special use permit required. For all new, relocated or replacement towers and antennas, including DAS/Microcells that do not meet the definition of a collocated/existing structure antenna, a tower special use permit shall be required.
- (4) The applicant shall also be responsible for all reasonable costs incurred by the Village in reviewing and analyzing an application, including but not limited to, any engineering or technical reports or studies submitted by the applicant relative to its application and any legal fees related thereto.

### **§ 256-3. Application for tower special use permit.**

A. remains the same.

B. Said application shall include:

- (1) A complete tower special use permit application form. In addition to the requirements set forth herein, all applications shall be processed in accordance with the requirements of §300-66 of the Code of Johnson City generally applicable to special use permits. The application shall be accompanied by the payment of the tower special use permit application fee of \$2,500 for non-DAS/Microcell towers, and \$75 for DAS/Microcell towers, or such other fee as determined by resolution of the Board of Trustees from time to time. In addition to the tower special use permit application fee, the applicant shall also be responsible for all reasonable costs incurred by the Village in reviewing and analyzing an application, including, but not limited to, any engineering or technical reports or studies submitted by the applicant relative to its application and any legal fees related thereto.
